Health Department,
Municipal Buildings,
Gillingham, Kent.
August, 1945

To the Mayor, Aldermen and Councillors of the Borough of
Gillingham.

Mr. Mayor, Madam, and Gentlemen,

I have the honour to report on the work of the Health Department for the year ending 31st December, 1944.

Vital Statistics :

The birthrate showed a further rise and reached the highest level since 1921. The death rate remained unaltered but was greater than in previous years. The infantile mortality rate of 47 is a satisfactory figure when compared with the rest of the country. There was a slight fall in the death rate from tuberculosis, but the rate remains above pre-war level. The number of cases of tuberculosis of the lungs notified shows a disturbing increase.

Infectious Diseases :

Measles appeared in epidemic form but the incidence of other infectious diseases was below the average. No deaths were recorded.

War-Time Nurseries :

A third nursery was opened in April, but some months later attendances began to fall and therefore the Railway Street Nursery for children under 2 years was closed in January, 1945.

Housing :

There is an acute shortage of housing accommodation but there are comparatively few cases of legal overcrowding. Innumerable young married couples are forced of necessity to live with one of their parents. The shortage of houses and of domestic help increased the demand for institutional maternity beds, of which there are insufficient in the area.

I wish to tender my thanks to the depleted staff of the Department for the valuable assistance they rendered, often under most difficult conditions.

I am,

Your obedient servant,

W. A. MUIR,
Medical Officer of Health.

During 1944 50.8 per cent. of infants dying under 12 months died during the first 4 weeks of life, and in 50 per cent. of these the cause of death was certified to be prematurity.

Care of Premature Infants :

In accordance with Circular 20/44 arrangements were made for the insertion of the baby's weight, if $5\frac{1}{2}$ lbs. or less, on the notification of birth cards. The Corporation now provides on loan, electric blanket pads, feeding tubes, mucus catheters and breast pumps. A draught proof cot is also available. All midwives have been notified of these appliances and encouraged to use them in appropriate cases in an endeavour to reduce the death rate among premature infants.

Maternal Mortality :

There were no deaths associated with pregnancy.

Birth Control Clinic :

This is conducted by Dr. Dunlop.

MUNICIPAL BUILDINGS,
GILLINGHAM, KENT.

March, 1945

To the Chairman and Members of the Education Committee.

Ladies and Gentlemen,

I have the honour to submit my report on the School Medical Department for the year ended 31st December, 1944. As requested by the Ministry of Education it has been made as brief as possible.

The health and well-being of the children continue at a satisfactory level. Of those examined at routine inspections 22 per cent were classified as of excellent nutrition and 73 per cent as of normal nutrition. There was a welcome fall in the incidence of scabies and also in the number of verminous children.

This is my final report as School Medical Officer to the Education Committee as at present constituted. As I consider that the School Medical service has been efficiently administered in the majority of Part III Authority areas, it is to be hoped that County Education Committees will delegate as many duties as possible to Divisional Executives and their officers. If non-county borough Medical Officers are appointed "Divisional Medical Officers" under the new Education Act an efficient service would be ensured. As, however, some matters will require to be referred to the County Committees, it seems evident that administration of the service will be slower and more cumbersome.

I have the honour to be,

Your obedient servant,

W. A. MUIR.

School Medical Officer

SCABIES

Arrangements were made for cases and their contacts to be treated at gas cleaning stations at Rainham Senior and Napier Road Boys' Schools. The routine treatment consisted of two paintings of Benzyl Benzoate Emulsion, and the results were most satisfactory. Compared with the previous year there was a marked reduction in the number of cases :—162 as against 236.

SPEECH DEFECTS

In accordance with an arrangement made with the County Education Committee selected children attend the special Clinic at Dartford.

CHILD GUIDANCE CLINIC

As a Child Guidance Clinic has not yet been established in the Medway Towns, appropriate cases are referred to a clinic held at the County Health Department, Maidstone.

HOME TEACHING SCHEME.

The number of children receiving instruction under this Scheme is six. They all enjoy and look forward to the lessons and the majority are making satisfactory progress. The curriculum includes handwork (rug making, knitting, sewing,) physical exercises, singing, games, etc.

The continued generosity of friends made it possible for each of the children to receive a Christmas gift.
